

# THE ROAD BACK FROM MENTAL ILLNESS IS EASIER TODAY!

When a patient leaves the mental hospital, his battle may be only half over. Having conquered his mental illness, he may now have to overcome other obstacles—prejudice, friendlessness, lack of follow-up medical care.

Fortunately, the returning mental patient is no longer on his own. Today his mental health association is by his side to help him find a job, new friends, and additional psychiatric care if needed.

Meanwhile, the association is supporting new research, seeking new and better ways to treat mental illness, even to prevent it. Help keep these vital programs going. **Join and support your mental health association!**
